Good day,

I am writing to apply for the software developer vacancy you advertised. I am an avid software developer with experience in a number of technologies, ranging from Azure, JavaScript, HTML, CSS, Java(SpringBoot), .Net languages (C# & VB.net), Xamarin, ReactJS, MySQL, MSSQL, PHP(YII), IBM WebSphere Messaging Queue and other related technologies.

The opportunity presented in this listing is very interesting, and I believe that my strong technical experience and education will make me a very competitive candidate for this position. The key strengths that I possess for success in this position include:

- I have developed and support applications that are used by millions of users.
- I am a team player; I work well with others in my team and across the organisation.
- I strive to learn more; I do constant research and side projects to learn more technologies and skills.

With a BSc degree in Information Technology, I have a full understanding of the full life cycle of a software development project. I also have experience in learning and excelling at new technologies as needed. I have been developing side projects that I host online; I believe this helps me in learning new concepts and technologies.

Please see my resume for additional information on my experience and projects. Additionally, you can check out my released apps on <https://play.google.com/store/apps/developer?id=Afrodeb+Studios> or personal portfolio on <https://github.com/afrodeb>.

You can reach me, via email at delon.savanhu@yahoo.com.

Thank you for your time and consideration. I look forward to speaking with you about this employment opportunity.

Sincerely,

Delon Savanhu
